

## SETTING UP 200M TOGGLE LINE

---

- 1 Connect clip on rope to the eye-bolt on eastern side retaining wall.
- 2 Tie other end of rope (taunt) onto the eye-bolt on western retaining wall.
- 3 Eye-bolts are located approx 3 retaining panels from the white markings for the start line.
- 4 Attach toggles to the main line.  
  
Red toggle on the first ring of the main line.  
  
(There should be 3 rings left on the western side, after the 6 toggles have been fixed).
- 5 Fix weights at the toggle points on the main line.
