

SETTING UP FINISH LINE – Torrens

1. From the boat shed, collect the crate containing the weights, the rope reel and the coloured buoys (hanging).
2. Attach the rope reel to the metal ring which is in front of the judge's caravan on the southern bank.
3. Paddle to the northern bank and tie the rope firmly at the base of the pole which has no light on top.
4. Lay the four buoys by attaching them at the metal rings, using a weight with each one in the following order - from the south bank - red 1, blue 2, yellow 3 and pink 4, fixing the weights at the buoy points.
5. Add a couple of extra weights to the northern end to avoid being dragged by the Popeye.
6. Bring in the line in the reverse order so that the free end on the reel is ready to be connected to the southern bank next time.
